Because talk isn't cheap...

There are many valuable reasons why companies record telephone conversations:

- **Customer service quality monitoring** - recording calls ensures best practice
- **Transaction recording** - record critical information to ensure accuracy of transactions
- **Compliance monitoring** - ensure industry regulations are met
- **Security alerts** - record bomb/violence threats and verbal abuse.

Flexible set-up for multiple applications

Set-up options include:

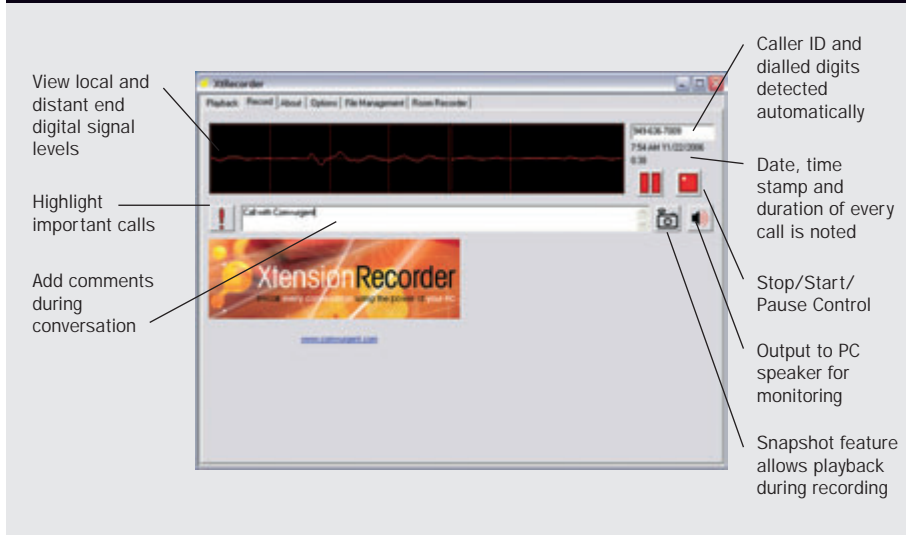

- Record all calls or manually select which to record
- Use compression to save disc space
- Save calls locally or on a network server for centralized monitoring and playback.

Almost every company has a call record application that can deliver substantial business benefits. What's yours?

Great Record Features:

Some application ideas:

- **Message Taking** - use Xtension Recorder to record a message instead of writing it down. Email the message to the recipient. It's like a mini Unified Messaging system.
- **Customer Service Desks** - Xtension Recorder is a great training tool. Move it around to different agents to monitor activity from time to time.
- **Operator Positions** - monitor how those important callers are being answered and transferred.
- **Call Centers** - install Xtension Recorder at each desk and record to a central server location for supervisor listening.
- **Conference Calls** - record those important discussions and decisions.
- **Dictation** - Xtension Recorder allows you to dictate directly into your phone and email the recording to an assistant.

Complete Playback Control:
